

PASSAGETM
INTRODUCER SHEATH

Rotating Locking System

- ✓ Optimizes comfort and easy handling.
- ✓ Prevents dilator pull back compare to other locking systems.

Unique Braided Structure

- ✓ Makes excellent pushability.
- ✓ Improves superior kink resistance and high visibility.

Advanced Hairwire

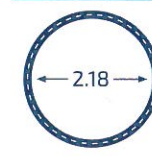

- ✓ Gentle angled tip reduces vessel hurts.
- ✓ Outstanding softness of the hairwire tip makes smooth insertion, and the robust nitinol body performs great pushability.

Hydrophilic Coating

- ✓ Partial hydrophilic coating allows advanced smooth insertion.
- ✓ Easy to access with less friction and spasm.

PASSAGE 6F

Standard 6F

Superior Thin Wall

- ✓ Makes smaller outer diameter and minimizes blood vessel resistance.

Smooth Transition

- ✓ Reduces insertion force and increases patient comfort.
